

ANSH KAPOOR

B.Tech Computer Science & Engineering Student | Student Developer | Aspiring Full-Stack Developer

Yamunanagar, Haryana, India | ANSH1225031@JMIT.AC.IN | JMIT / Kurukshetra University (KUK)

PROFILE

2nd-year Computer Science & Engineering student focused on programming, web development, data structures and practical software projects. Building full-stack applications with React, Node.js, Express and MongoDB while strengthening C++ and DSA foundations.

EDUCATION

B.Tech - Computer Science & Engineering

Seth Jai Prakash Mukand Lal Institute of Engineering and Technology (JMIT)
Kurukshetra University (KUK) | Yamunanagar, Haryana

2024 - 2028

2nd Year (Current)

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript

Frontend: HTML5, CSS3, React.js, Responsive Design

Backend: Node.js, Express.js, REST APIs

Databases: MySQL, SQL, MongoDB

CS Fundamentals: DSA, OOP, Recursion, Sorting, Searching, Arrays, Linked Lists, Stacks, Queues

Tools: Git, GitHub, VS Code, npm, Vite

PROJECTS

Developer Portfolio

React, JavaScript, CSS, Node.js, Express, Framer Motion

- Built a full-stack multi-page portfolio with React Router, responsive design and dark/light theme persistence.
- Implemented smooth page transitions, animated UI, REST API contact integration and an admin dashboard structure.
- Balanced visual motion with reusable styling and a cohesive editorial design system.

Student Task Manager

React, Node.js, Express, MongoDB, REST API

- Developing a student-focused task manager for assignments, courses, priorities and deadlines.
- Uses RESTful CRUD patterns, MongoDB persistence, filtering/sorting and responsive UI.
- Applying MERN-stack concepts including React state management and Express middleware.

Weather Application

JavaScript, REST API, HTML, CSS

- Built a responsive weather app that fetches real-time data from an external REST API.
- Implemented city search, current weather details, dynamic weather icons and invalid-search error handling.
- Strengthened async/await, JSON data handling, DOM manipulation and API integration.

C++ DSA Repository

C++, DSA, Algorithms

- Building a reference repository covering arrays, linked lists, stacks, queues, recursion, sorting and searching.
- Includes complexity analysis and clean implementations for learning and problem-solving practice.

HACKATHON & DEVELOPMENT HIGHLIGHTS

- First Hackathon Participant - contributed as a full-stack developer across frontend UI, backend/API integration and database work under time constraints.
- Version Control - adopted Git and GitHub for code management and collaborative development.
- Current focus - strengthening DSA in C++, building full-stack applications, and exploring authentication, cloud deployment and modern developer workflows.

Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Operating Systems, Discrete Mathematics.
